

STATIONARY MEDIA MOBILE PRINTING

ABSTRACT

5 A portable printer includes a top cover, a bottom cover, one or more rail
units located on the inside surface of the top cover, and a carriage assembly.
Media is positionable on the inside surface of the bottom cover. The carriage
assembly is movably connected to the rail units, such that the carriage
assembly is able to move at least one of horizontally and vertically over the
10 media, and print on substantially any part of the media, wherein the media is
capable of being stationary during printing.
